ABSTRACT

This publication represents a basic analysis of state correctional education data collected in 1992. It presents six summary tables that capture key data collected in 1992-1993 for adult and juvenile facilities as well as profiles of the states that responded to the survey. Forty-three states responded to the survey and one was eliminated because of missing data on key variables. Almost all states offer Adult Basic Education and GED preparation courses, and 23 of the 40 states offering such education offer it at every facility. An average of 62% of facilities within states offered high school coursework, with 10 states offering high school coursework in all facilities. An average of 69% of correctional institutions offered some type of vocational education, and vocational education was offered at every facility in 10 states. Only an average of 39% of correctional facilities within each state offered special education, but life and social skills training was offered at an average of 79% of correctional institutions within the states. Most inmates were enrolled in Adult Basic Education or GED instruction. Thirty-nine states responded to the survey about juvenile correctional education, but only 36 states provided a complete set of data. Almost all juvenile facilities offer elementary and secondary academic instruction, GED preparation, special education, and life and social skills training. Vocational education is offered at an average of 86% of juvenile institutions within a particular state. Appendixes contain profiles of education in adult and juvenile facilities. (SLD)

UNITED STATES DEPARTMENT OF EDUCATION

OFFICE OF VOCATIONAL AND ADULT EDUCATION

March 1, 1996

Dear Colleague:

Thank you for your interest in correctional education. This publication represents a basic analysis of state correctional education data collected in 1992. More current information, born of a large-scale study of correctional education in state medium-security facilities that is currently underway, will be available in about a year. In the meantime, we hope these national summaries and state profiles, though incomplete, will provide you with a perspective on the nature and extent of correctional education programming across the Nation. The gaps you will notice in the state profiles speak to the challenging nature of data collection and research in correctional settings. The only thing perhaps more profound than this challenge is the need for information on correctional education efforts and their impact.

We hope that you find this publication of assistance to you in your efforts. Please contact the Office of Correctional Education if we can be of assistance to you in quantifying the effectiveness of your correctional education program.

Sincerely,

Richard Smith
Director
Office of Correctional Education

600 INDEPENDENCE AVE., S.W. WASHINGTON, D.C. 20202

Our mission is to ensure equal access to education and to promote educational excellence throughout the Nation.

Introduction

In 1992-93, Pelavin Associates (now Pelavin Research Institute) developed three survey instruments to test the feasibility of collecting data on correctional education provided to inmates in adult prisons, juvenile facilities, and jails. The three instruments were designed to gather information on the types of educational programs offered at correctional institutions, the number of inmates who participated in these programs, and the staffing and financial resources used to provide education.

Currently, another survey that capitalizes on the 1992-93 effort is being developed. This survey will provide more substantive and current information on the provision of correctional education in the states.[1]

This report presents several summary tables that capture key data collected in 1992-93 for adult and juvenile facilities as well as profiles of those states that responded to the survey. The states that responded to these surveys should be acknowledged for providing both the time and effort in producing information that describes correctional education programs.

Results

All data reported below cover the period from July 1, 1990 to June 30, 1991.

Survey of Adult Correctional Education

Forty-three states responded to the 1992 Survey of State Adult Correctional Education Agencies. One state was eliminated from the analysis because of missing data on key variables.

---

[1]This survey is scheduled to go into the field in the fall of 1996 and collects data on the 1994-95 fiscal year. While it focuses to a large extent on adult male, medium security facilities, considerable information is gathered about correctional education in general.

The results presented below combine responses from the long and short forms of the survey.[2] Table 1 presents the number and average percent of various correctional education offerings for adult correctional facilities. The first column of the table displays the number of states that reported offering a particular subject area. The number of facilities within a particular state offering specific subject areas was divided by the total number of correctional facilities within the state to calculate the percentage of facilities within the state that offered a specific correctional education program. The overall average for all states is presented in the second column.

Table 1 reveals that almost all facilities offer Adult Basic Education and GED Preparation Courses. Twenty-three of the 40 respondent states reported that Adult Basic Education and GED Preparation Courses were offered at every correctional facility within their state. Of these 23 states, 22 states offered Adult Basic Education and GED Preparation in every correctional institution within their state. Maine reported that Adult Basic Education was offered in all facilities while GED Preparation was offered in 67 percent of its correctional institutions. Wyoming offered GED preparation in all facilities and Adult Basic Education in 50 percent of its correctional institutions. The lowest percentages were found in Wisconsin and Wyoming where 50 percent of the correctional institutions offered Adult Basic Education. Wisconsin and Delaware reported 50 percent of their institutions offered GED Preparation.

[2] Two versions of the adult and juvenile surveys were administered. In response to concerns over the length of these two state survey instruments, short versions of each were developed that kept a core set of questions of interest. Some states responded to the "long" versions of the survey and others responded to the "short" version.

TABLE 1

Adult Facilities (N=42) Offering Correctional Education Programs

	Number of States Offering	Average Percent of Institutions Offering Within State
Academic Education	41	—
ABE	40	91
GED Instruction	40	92
High School Coursework	26	62
ESL	27	57
Vocational Education	42	69
Postsecondary Education	38	60
Special Education	33	39
Life and Social Skills Training	39	79

Fewer states responded to the remaining academic subject areas, high school coursework and English as a Second Language (ESL). An average of 62 percent of facilities within states offered high school coursework. The following ten states reported offering high school coursework in all correctional facilities within their state: New Jersey, Pennsylvania, South Dakota, Utah, Virginia, Vermont, Washington, Montana, North Dakota, and California. The following seven states reported that ESL was offered at all facilities within their state: Hawaii, Nebraska, Utah, Washington, North Dakota, Rhode Island, and California.

An average of 69 percent of correctional institutions within states offered some type of vocational education. The following ten states reported that vocational education was offered at all correctional institutions within their state: Nebraska, New Jersey, Pennsylvania, Vermont, Washington, West Virginia, Montana, North Dakota, Wyoming, and California. The lowest percentages of facilities within a state offering vocational education were reported by Mississippi

(15 percent) and Nevada (18 percent). Both Mississippi and Nevada did not report data for the academic subject areas discussed above.

Table 1 also reveals that an average of 60 percent of correctional institutions within each state offered postsecondary education. Seven states (Arizona, Nebraska, New Jersey, Pennsylvania, Washington, Minnesota, North Dakota) reported offering some type of postsecondary education at all of the institutions within their state. The lowest in-state percentages for postsecondary education, among the states that responded, were found in North Carolina (7 percent), Delaware (12 percent), Wisconsin (15 percent), Mississippi (15 percent), Maine (16 percent), and Connecticut (18 percent).

Only an average of 39 percent of correctional institutions within each state offered special education. Three states (Pennsylvania, North Dakota, Connecticut) reported that special education was offered at each facility within the state.

Finally, Table 1 reveals that Life and Social Skills Training was offered at an average of 79 percent of the correctional institutions within the states. Of the 36 states that responded, 18 indicated that Life and Social Skills were offered at every institution within the state. The lowest percentages were found in Virginia (8 percent) and Mississippi (10 percent).

Table 2 presents the average percentage of inmates who were served by correctional education in 1990-1991. Because a limited number of states responded to questions about the number of inmates served, these results should be viewed as conservative. Interpreting the results for the subject areas within academic education are also problematic because respondents could elect to ignore the specific subject areas and answer the category of "All Subjects".

Nevertheless, Table 2 is consistent with Table 1 in revealing that most inmates are enrolled in Adult Basic Education or GED Instruction. For Vocational Education, the largest percentage of inmates served are found in Business/Typing, Auto Mechanics, and Welding.

TABLE 2

Percentage of Inmates Served in Adult Correctional Education Programs (N=40)

	Number of States Responding	Average Percent
Academic Education		
ABE	14	09
GED Instruction	13	06
High School Coursework	6	00
ESL	10	01
All Subjects	25	15
Vocational Education	23 *	07
Auto Body	14	08
Auto Mechanics	15	15
Business/Typing	17	24
Carpentry	17	12
Drafting	12	10
Electronics	8	08
Food Services	17	09
Horticulture/Landscaping	11	08
Machine Shops/Small Engine Repair	14	08
Masonry	9	04
Welding	15	13
Special Education	19	01

Twenty-six states responded to questions that asked both the number of inmates served by all correctional education programs and the total number of inmates within the state system. These two numbers were used to calculate an overall percentage of inmates served by correctional education programs. Among the states reporting these numbers, Minnesota (43 percent) and Hawaii (40 percent) had the highest percentages of inmates enrolled in correctional education. Three other states (Arizona, Illinois, and Virginia) reported 31 percent of inmates participating in correctional education programs. The majority of the inmates in these states were enrolled in adult basic education programs. The lowest rates of participation were reported by Mississippi (4 percent) and Maine (9 percent).

Table 3 displays the administrative structure for adult correctional education systems. The most common method of administration is through the state department of corrections (43 percent). Twenty-one percent of the states reported being administered within a correctional school district while 19 percent of the states reported having decentralized systems. The administrative structure for individual states is also displayed in Figure 1. Nine of the 43 states (21 percent) reported that the administration of adult correctional education was combined with juvenile correctional education.

Other	3	7.1

Survey of Juvenile Correctional Education

Table 4 presents the number and average percent of correctional education programs that are offered within juvenile correctional facilities. Thirty-nine states responded to the 1992 Survey of State Juvenile Correctional Education Agencies. Three states were eliminated from the analysis because of missing data for key variables. The results presented below combine responses from the long and short survey forms.

TABLE 4

Juvenile Facilities (N=36) Offering Correctional Education Programs

	Number of States Offering	Average Percent of Institutions Offering Within State
Elementary and Secondary Academic Instruction	36	99
GED Preparation	35	90
Prevocational and Vocational Education	36	86
Postsecondary Education	15	41
Special Education	35	92
Life and Social Skills Training	36	97

The results from Table 4 reveal that almost all juvenile facilities offer Elementary and Secondary Academic Instruction, GED Preparation, Special Education, and Life and Social Skills Training. All states, with the exception of South Carolina (75 percent), reported offering Elementary and Secondary Academic Instruction in every juvenile facility within the state. Twenty-eight states reported offering GED Preparation for all juvenile facilities within the state. Utah reported that GED Preparation was offered in 38 percent of its juvenile institutions while South Carolina, Virginia, and New Hampshire reported that GED Preparation was offered in 50 percent of its juvenile facilities.

Vocational Education is offered at an average of 86 percent of juvenile institutions within a particular state. Twenty-four states reported that vocational education was offered at all institutions within the state. The lowest in-state percentages were reported by Utah (13 percent), Mississippi (33 percent), Maryland (43 percent), New Hampshire (50 percent), and Louisiana (50 percent).

Most states did not report offering postsecondary education to juveniles. Only Colorado and Idaho reported that all juvenile facilities in their states offered postsecondary education. Other states with high in-state percentages included North Carolina (80 percent) and Kansas (75 percent).

Twenty-six states reported offering special education in all of the juvenile facilities within their states. The lowest in-state percentages were reported in Maryland (29 percent), South Dakota (33 percent), and South Carolina (50 percent). Thirty-two states reported that Life and Social Skills Training were offered at every juvenile facility within the state. Utah reported that 38 percent of its juvenile institutions offered Life and Social Skills Training.

Table 5 presents the percentage of inmates served in juvenile institutions. Almost all juveniles (93 percent) are served by Elementary and Secondary Academic programs. Thirteen states reported that all juveniles in their correctional systems were served in these programs. Ohio reported the lowest percentage (33 percent).

Although many states reported offering GED Preparation (See Table 4), fewer states responded with data describing the number of participants in these programs. The 14 states that did respond reported an average of 14 percent of juveniles participating in GED Preparation courses. Ohio (38 percent) and Colorado (34 percent) reported the highest in-state percentages.

Nineteen states reported that an average of 70 percent participated in Vocational Education Programs. Six states (Tennessee, Arkansas, Minnesota, Idaho, Mississippi, and North Carolina) reported all of the juveniles in their system were enrolled in vocational education. The lowest in-state percentages were reported by Ohio (17 percent) and Colorado (17 percent). The highest average percents for subject areas within vocational education included Auto Body, Business/Typing, Horticulture/Landscaping, and Welding.

TABLE 5

Percentage of Inmates Served in Juvenile Correctional Education Programs (N=26)

	Number of States Responding	Average Percent
Elementary and Secondary Academic Education	26	93
GED Preparation	14	14
Prevocational and Vocational Education	19	70
Auto Body	8	22
Auto Mechanics	9	8
Business/Typing	7	20
Carpentry	9	17
Drafting	—	—
Electronics	2	16
Food Services	7	12

Machine Shops/Small Engine Repair	4	8
Masonry	5	13
Welding	10	19
Postsecondary Education	10	07
Special Education	19	37
Life and Social Skills Training	17	88

Table 6 describes the administration of juvenile correctional education programs. The results from this table, also portrayed in Figure 2, reveal that the administration of juvenile correctional education programs is quite varied. Twenty-four percent of the states report decentralized systems, 21 percent are administered by other state agencies, 18 percent by correctional school districts, and 13 percent by both state departments of corrections and state departments of education.
